“The Trustees at their meeting on January 23, 1989 voted that”

“All new or replaced tombstones in the McCutchanville Cemetery located on Kansas Road near the McCutchanville Methodist Church in McCutchanville, Indiana (Vanderburgh County), will require at least a 24 inch (total) deep footing of mixed, poured solid concrete beneath the tombstone to prevent settling of the stone, and also at least a two-inch border all the way around the base of the stone, and shall be set with a level and plumb bottom, with uniform thickness.”
Footer’s not meeting specifications will be removed at your company’s expense.
